

## Count With Me

*Raffi © 2004 Homeland Publishing*

One two three, count with me  
Add up what we want to see  
In a world that's fit for growing kids & good community.

Two three four, close the door  
On all that we want no more  
Like crime, pollution and the pain of chronic poverty.

Adding indiscriminately, that's what's wrong with the GDP  
Counting only the money, makes no sense to me  
It's time we measured quality, the mark of true prosperity  
An *Index of Wellbeing* for the betterment of life.

Tasty food on the table, good clean water, clean fresh air,  
A recipe for growing strong in healthy family, so

One two three, count the dough  
In all of what we want to grow  
For living well and doing good, in joy and harmony.

An *Index of Wellbeing* shows all that really matters most  
A picture of a peaceful life and true prosperity  
Let's embrace an economy in service of humanity  
Choosing leaders everywhere who think sustainably.

Adding indiscriminately, that's what's wrong with the GDP  
Counting only the money, makes no sense to me  
It's time we measured quality, the mark of true prosperity  
An *Index of Wellbeing* for the betterment of life.

la la la, la la la ...
